DIFFUSED WHITE LAMINATE

Great for areas where you want light, privacy and a clean, fresh look!

- Under heat and pressure, "lami" glass is constructed with a PVB plastic interlayer between 2 sheets of glass to form one single, opaque, impact resistant sheet.
- Laminated glass has a sound control rating of STC 34, effectively blocking out unwanted noise.
- Screens out harmful ultraviolet light
- Reduced risk of shattering or penetration – glass particles cling to vinyl interlayer increasing security and peace of mind.
- Smooth both sides for easy clean up and peel coating protects glass during painting
- Doors come factory primed
- 1/4" clear tempered glass and obscure glass available to replace any square panel in either Infinity with a raised molding or Ovation with your choice of sticking.
